

The **new owner** should use this form to apply for continued operation of a high capacity well after a change of ownership.

You may use this form to notify the Department that the well will no longer be located on a high capacity property. See FAQ on reverse page to determine if your property no longer fits the definition of a high capacity property.

Use form 3300-256 when applying for initial construction, reconstruction or increased pump capacity of a high capacity well.

Notice: Personally identifiable information collected on this form, including such data as your name, address and phone number, will be used for management of department programs and is unlikely to be used for other purposes. This information may be made available to requesters under Wisconsin's Open Records Laws, ss. 19.32 - 19.39, Wis. Stats.

New Owner Information			
New Owner (Name of Person and Title)		Company	
Street Address	City	State	ZIP Code
Telephone Number	Fax Number	E-Mail Address	
Former Property Owner Information			
Former Owner (Name of Person and Title)		Company	
Street Address	City	State	ZIP Code
Telephone Number	Fax Number	E-Mail Address	
Well Operator Information			
Well operator if different than new owner (Name of Person and Title)		Company	
Street Address	City	State	ZIP Code
Telephone Number	Fax Number	E-Mail Address	
Property Information			
Obtain the High Capacity Well File Number from the previous owner and enter it below. The file number is in the upper right hand corner of the most recent high capacity well approval. File number format is as follows: (1 or 2 digits for county) - (1 digit for well classification) - (1 to 4 digits for assigned property no.). If you have more than one file number, use a separate form for each file.			
County	Town	High Capacity Well File No.	

☐ This is no longer a high capacity property.

Required Attachments

Attach one of the maps described in A. or B. below. Plot the existing well locations on the map. For wells that have a Wisconsin Unique Well Number or a High Capacity Well Number, plot the well locations with one of those numbers.

- Copy of a plat map with property boundary clearly shown. If the property is contiguous with properties that you own in another township, include a copy of that township map too, showing the property boundaries. If you are not identified on the plat map as the owner, list the date or dates that you purchased the property.
- Map of the property prepared by a licensed land surveyor and the property description as described by the surveyor.

High Capacity Well Ownership Change

Form 3300-266 (6/08)

FAQ and Definitions

What is a high capacity well? A high capacity well is any well on a high capacity property. A high capacity property is one property that has or will have one or more wells with a combined approved pumping capacity of 70 gallons per minute (gpm) or more. The capacity for each well is determined by the rated maximum capacity of the pump installed in the well, or the rate that the well flows at if it is a flowing well. The total capacity of all wells on the property is used to determine whether or not the wells are high capacity wells. Thus, in some cases residential wells are high capacity wells, even if every well on the property has a capacity of less than 70 gpm.

"Public water system" means a system for the provision to the public of piped water for human consumptions if such system has at least 15 service connections or regularly serves an average of at least 25 individuals daily at least 60 days per year. A public water system is either a community water system or a non-community water system. Such system includes: (a) Any collection, treatment, storage, and distribution facilities under control of the operator of such system and used primarily in connection with such system, and (b) Any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.
